

Farm Machinery Rental

SMALL-HOLDER PROGRAM

Farm Power

“ Making farm tractors and implements available to Nigerian farmers ”

To the millions of peasant farmers in Nigeria...

1. In order to improve productivity and reduce the drudgery in farming
2. In order to ensure food security and provide Nigeria's majority rural dwellers economic opportunities

Increase the mechanization process

“renting affords farmers the use of farm machinery”

RentWorks® presents the Small-Holder Rental Program...

...the lease & hire of utility tractors and implements and attachments to mechanize -

- Land preparation
- Seed planting & fertilizer application
- Sprayers & Slashers for weed control
- Reapers & Threshers for harvesting
- Tipping Trailers for produce haulage

Deepen the Mechanization Process

“ more production processes are mechanized ”

Lease a tractor for the planting season, and rent the implements and attachments, as and when needed, to perform all your crop production operations.

The tractor as an arrowhead

The John Deere 5403 tractor is suitable for working efficiently and economically with most agricultural implements/equipment. The tractor has a record of over 150 years of world proven performance in Agricultural Operations. This has been demonstrated by the continuous high demand of the machine by Nigerian farmers since introduction in 2008. The 5000 series is the current model specifically designed for tropical conditions of Asia and Africa; with minimal electronic gadgets for easy maintenance.

Tillage & Cultivation

Harrow

The BeriFieldking Harrow is strong for heavy and rugged soil condition and has proven performance in Nigeria since it was introduced into the country more than 10 years ago.

Plough

Ploughing loosens and aerates the top layer of soil which can facilitate the planting of the crop. The Beri Fieldking plough model is constructed from high grade heavy duty tubular steel frame with welded hanging Disc Standard. The structural design of the implement is robust on all Nigerian soils. Its cutting width produces high field efficiency.

Ridger

The Beri Fieldking ridger is a 2 row, 4 bottom Disc Ridger with 3-point hitching facility. The Ridger frame is made of heavy duty box type steel fitted with 4 curved plain disc blades thick enough to withstand abrasive soil condition. Another quality product from the Beri Fieldking ranges. This implement also has over 10 years proven performance on Nigerian soils and is favorite of many of our farmers.

14-Disc Harrow

3-Disc Plough

4-Bottom Ridger

Special Applications

Planter

The John Deere 1010 Planter is top of its range and is available in 2, 3 and 4 rows. It is especially ideal for crops like Sorghum, Corn, Soy, Cotton and edible Beans. It is very ideal for our Nigerian agriculture and consists of several systems: Fertilizer, Insecticide and Seeding inplanting systems.

Sprayer

Our Green System sprayers from John Deere perform multiple functions and are most ideal for application of herbicides and pesticides to agricultural crops.

Rotary Slasher

The BeriFieldking Rotary Slasher is powerful enough to cope with tall weed and small bushes, providing a cost effective grass cutting solution.

Harvesting Solutions

We recognise the importance of harvesting as a key area in overall crop production. This should be done within the shortest time frame to avoid high field losses. Our Reapers and Threshers are more than a match for these processes for efficient cutting and gathering with minimal loss of crop.

Thresher

Reaper

Produce Haulage

The BeriFieldking Tipping Trailer is made of steel fitted on single axle which is capable of transporting several tons of various farm produce and general purpose goods. It is already a successful and established brand in Nigeria and currently in use all over the country. This is designed to the current standard model of Agricultural Tipping Trailers with over 5 years proven performance in Nigeria.

Tipping Trailer

RentWorks® deploys the highest quality machines to minimize downtime and loss of timely farm operations

- a. Programs available:
 - 1. **Daily rental**
 - 2. **Short-term rental (up to 3 months)**
 - 3. **Medium-term rental (up to 9 months)**
 - 4. **Long-term rental (up to 36 months)**
 - 5. **Rental includes repairs and maintenance by RentWorks®**
- b. Available are full-service rentals that include operators and fuel
- c. Also available are rental packages that provide replacement machines
